Profile

I am a digital developer and designer, familiar with understanding the development and design software used for keeping your business running. I am adept in a myriad of programming languages and i don't know if it is useful in this endeavor, but this knowledge has made me more organized in other aspects of life. I also know how to use all programs on windows, mac, and linux systems for word processing. I've worked on a few website redesigns for **www.myspacenyc.com** and **www.rotorandwing.com**. I've also worked in back-end development environments as well, creating apps and search engine databases.

Skills

Back-End: Javascript, GIT, Linux, WebGL, Swift and PHP.

Front-End: HTML5, CSS3, SASS, LESS, Angular, Bootstrap, Wordpress, and Drupal.

Design: Photoshop, Illustrator, InDesign, After Effects, Cinema 4d, Z-brush and Sketch Up.
